## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Toda et al (US patent 5712540).

Toda et al teach a control system for a plurality of electrical motors comprising a first motor/load 33, a first driving switching circuit 4 including a first switch Ua/Va/Wa connecting a first terminal of the motor to a power supply terminal and a second switch Xa/Ya/Za to ground, a second motor/load 34, a second driving switching circuit 13 including a third switch Ub/Vb/Wb connecting a power supply terminal to a motor terminal and a fourth switch Xb/Yb/Zb connected to ground, switching means 26 for operating the first and second switches, switching means 27 for operating the third and fourth switches, and switching means 25 for controlling switching means 26 and 27.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The documents cited in form PTO-892 describe other systems for controlling a plurality of motors using several inverters.
